

ROLE CARD · OPERATOR · SHOP-FLOOR KIOSK

Operator — Your Kiosk

Your station: the kiosk screen at your work center. You sign in with your badge — no password, ever. Everything you do is recorded under your name (AS9100D requirement).

SIGN IN

- 1 Scan your badge anywhere on the screen — no need to tap a field first. No scanner handy? Tap the on-screen number pad and enter your badge number.
- 2 The kiosk returns to the badge screen after about 4 minutes idle (a 30-second countdown warns you). Your work is saved — just badge back in.
- 3 Never share badges or work under someone else's login. A badge is a full identity.

RUN A JOB

- 1 Tap your job in the queue, confirm, **CLOCK IN**. Two taps.
- 2 Job has steps? Tap **REVIEW STEPS** on the confirm card before you start.
- 3 **REPORT PRODUCTION** during the run: good count + scrap count. Any scrap requires a reason tile — the server refuses scrap without one.
- 4 Record process steps as you go — the “Steps 2/6” chip tracks required vs. recorded.
- 5 Done? **COMPLETE** clocks you out with final counts, then completes the operation.
- 6 Stuck? **HOLD** — pick the blocker category (material, machine, tooling, quality...). A supervisor resumes it from the desktop; there is no resume button on the kiosk.

FIX A MISTAKE

- Never retype over a recorded value. Tap **CORRECT**: give a reason plus the new value. The original stays visible marked “superseded” — that is required evidence, not a bug.

IF THE SCREEN SAYS OFFLINE

- Buttons gray out and nothing is queued in the background. Keep running the part; write counts on the paper fallback form at your station. When the banner clears, press the action again — what you typed is still there.

WATCH OUT

TRAP — Hitting target and walking away: clocking out at target always saves your hours, but the job stays IN PROGRESS if step records are still owed. Read the toast — finish the steps, then COMPLETE.

TRAP — “Previous operations must be completed first” means the job is not ready for you yet — check with your lead instead of retrying.
