

PAPER FALLBACK · USE ONLY WHEN THE KIOSK IS OFFLINE

Production Recording — Offline Fallback

Paper mirrors the system; it is not the system. Hand this sheet to the back-entry owner the same day — records are keyed in by a signed-in person so they stay attributable.

DATE _____ WORK CENTER _____ REASON _____ SHEET BY _____

OPERATOR (NAME / BADGE)	WO #	OP SEQ	CLOCK IN	CLOCK OUT	QTY GOOD	QTY SCRAP	SCRAP REASON (REQUIRED IF ANY)	STEPS / NOTES

Back-entry scope: quantities good/scrap (scrap always needs its reason — the system refuses it without one, so fill that column now) and notes are keyed into the work order's operation. The system stamps its own times and cannot re-create clock-ins — copy the operator names and clock times into the entry notes as “paper backfill per WERCO-OB-14,” and keep this filed sheet as the labor time record for the outage. Nothing back-entered ever shows up as kiosk activity.
