

QUICK CARD · EVERYONE

Logging In & Staying In

wercomfg.app · Two ways in, and every timeout below is compliance behavior — not a bug.

TWO WAYS IN

- **Office staff:** Email + password at wercomfg.app/login.
- **Shop floor:** tap the “Badge ID” toggle and scan or type your badge number — no password. Kiosk screens go straight to the badge prompt.
- Passwords: at least 12 characters with upper + lower + number + special, no common words. Only you or an Admin can change it.

TIMEOUTS YOU WILL MEET

- **Office app: 15 minutes idle** logs you out (a 60-second warning appears first). **Kiosk screens: about 4 minutes idle** returns to the badge prompt — just scan back in.
- **24 hours absolute:** everyone re-logs-in at least daily, no matter what.
- **5 wrong passwords = locked 30 minutes.** There is no admin unlock — wait it out, then try once.
- **“Rate limit exceeded”** = too many logins from the building within a minute. Wait about 60 seconds; don’t hammer the button.

FIND YOUR WAY

- Your first **desktop** login auto-plays the 4-step Getting Started tour (kiosk screens skip it — operators get hands-on training instead). Skipping is fine — replay any tour from the **? Help & Tours** menu in the top bar (desktop only).
- **Ctrl+K** finds any part, WO, customer, PO, quote, or vendor. Try a phrase like “late laser jobs waiting on material.”
- **Ctrl+I** keyboard shortcuts · **Ctrl+** Copilot assistant · **Esc** closes.
- All timestamps display in Central time.

ACCESS REQUESTS

- New colleague? Self-registration creates an **inactive** account an Admin must approve with the right role — route new-hire access to the admin, not to a shared login.
- Leavers are deactivated, never deleted (audit trail).
- **Lost badge = report it immediately.** A badge alone is a full login for that person.
