

ROLE CARD · FRONT DESK · RECEPTION

Front Desk

Devices: the lobby visitor tablet, plus the Visitor Log page in the office. The visitor record is AS9100D / CMMC evidence — the end-of-day zero matters.

THE TABLET

1	Each morning, unlock the tablet with the station PIN — the session then lasts 24 hours.
2	Visitors self-serve: Sign In needs a name, a purpose tile, and the safety/NDA checkbox (“Other” purpose needs a note). Company, phone, and host are optional.
3	Host check-in emails only fire on an exact full-name match — help visitors spell the host's name.
4	Sign Out is by typed name; duplicates show a picker. “No open visitor record found” means they never signed in or were already signed out.
5	The form wipes itself after 120 seconds idle (privacy) — the visitor just starts over. Tap LOCK STATION at end of day.

END OF DAY

1	Open the Visitor Log page: the on-site count must read zero at close.
2	Sign out stragglers with the staff sign-out button (Admin/Manager).

WATCH OUT

TRAP — Tablet OFFLINE = no electronic sign-in, and nothing queues. Use the paper visitor form — it is a compliance record — and back-enter the visits the same day.
